

Lakes, Rivers Hydrology and Permafrost		
Advances in airborne Remote Sensing of hydrologic Change in cold Regions	Cherry	Jessica
Spatiotemporal variability in thermokarst lake distribution in Western Siberia	Mård Karlsson	Johanna
Use of Remote Sensing for Studies of hydrological Regime of the permafrost-affected Watersheds of Western Siberia	Zakharova	Elena
Cold-regions river surface velocity Fields observed from tracking River Ice in Space Imagery	Kääb	Andreas
Very high resolution SAR data for Glacial Lake Monitoring	Wiesmann	Andreas
Scientific preparations for the Candidate Earth Explorer 7 mission CoReH2O	Kern	Michael
Circumpolar freeze/thaw Surface Status and Surface Soil Moisture from Metop ASCAT	Bartsch	Annett
Polarimetric Observations of Tundra Landscapes with RADARSAT-2	Sobiech	Jennifer
Assessing Phytal Pigment Content in Polar Ecosystem Community by Remote Sensing and in situ Investigation	Micheli	Carla
Global Fiducials Program Remote Sensing of the Cryosphere and Cold Regions Processes	Molnia	Bruce
Monitoring Snow,Glaciers and Lake Ice using Earth Observation Data in the GMES Project Cryoland	Nagler	Thomas
Snow, Snow Albedo and Snow Water Equivalent		
VIIRS Snow Products	Appel	Igor
Unmanned measurements of snow pack radiative properties.	Burkhart	John
The snow surface Evolution at Dome C, Antarctica, by in-situ near-infrared Photography and passive Microwave Satellite	Champollion	Nicolas
European Snow Cover Characteristics between 2000 and 2011 derived from improved MODIS Daily Snow Cover Products	Dietz	Andreas
A satellite-based snow Cover Climatology for the European Alps derived from AVHRR Data (1985-2011)	Hüsler	Fabia
Backscatter Signatures of seasonal Snow Cover at X and Ku Bands	Lemmetyinen	Juha
Feasibility of ESA GlobSnow Snow Extent to boreal forest zone climate change studies	Metsämäki	Sari
The DMRT-ML Model: numerical Simulations of the microwave Emission of Snowpacks based on the Dense Media Theory	Picard	Ghislain
Towards an understanding of the snow pack response at microwave frequencies through high resolution snow measurements.	Proksch	Martin
Comparing high resolution snow Characterization on the regional Scale with airborne SAR Measurements	Proksch	Martin
Study on the passive Microwave Remote Sensing of the shallow snow Cover over Tibetan Plateau Area, China	Qiu	Yubao
Effect of Grain Properties on Infrared Retrievals of Snow Grain Size	Richardson	Mark
Improvements in snow monitoring using a coupled snow evolution – microwave emission model	Royer	Alain
Snow Cover Changes Over Turkey	Tekeli	Ahmet Emre
Investigating the relationship between Eurasian snow and the Arctic Oscillation in observations and models	Clifford	Debbie
SIOS - Svalbard Integrated Arctic Earth Observing System	Lonar Barth	Vigdis

New Insights on Variability and Change in the Canadian Cryosphere using Satellite Data Sets	Walker	Anne
Reducing Uncertainties in Mass Balance Estimates		
CryoSat cal/val Activities on Austfonna - Part I: Ground-based Monitoring of firn Extent and Thickness	Dunse	Thorben
Volume Change of the Antarctic Ice Sheet from repeat-track Altimetry	Flament	Thomas
Constraining ice Sheet Mass Balance Trends using Cryosat-2 and laser Altimetry	Bamber	Jonathan
Ku-Band Penetration obtained from airborne Radar and Laser Altimetry and TerraSAR-X in a blue ice Area in Antarctica	Helm	Veit
Mass change Estimates from satellite Altimetry (1996-2008) in the Amundsen Sea Embayment, West-Antarctica	Hurkmans	Ruud
CryoSat cal/val Activities on Austfonna - Part II: Ground-based Ku-band Radar for Validation of the CryoSat-2 SIRAL	Langley	Kirsty
Impact of firn Processes on Antarctic ice sheet elevation Changes	Ligtenberg	Stefan
Connecting Glaciers to 150 lake level Changes at the Tibetan Plateau.	Vu	Phan Hien
Antarctic Ice Sheet Topography from CryoSat-2 interferometric mode Data	McMillan	Malcolm
Radar and Laser Altimeter Elevation Measurements Comparison for Antarctica Ice Sheet	Michel	Aurelie
Investigating February 2000 snow cover/radar penetration on glaciers by comparing C-band and X-band SRTM DEMs	Nuth	Christopher
Combining satellite and aircraft measurements to investigate the geometry and dynamics of outlet glaciers in Greenland.	Palmer	Steven
Validation and Inter-Comparison of ice velocity Fields from SAR Data – Preliminary Results of Round Robin Experiments	Scharrer	Kilian
First results for mass balance estimates from GRACE, radar altimetry, InSAR, and RCM data for the Amundsen Sea Embayment	Schoen	Nana
Interpolation of accumulation Rates by means of airborne Remote Sensing	Steinhage	Daniel
Improving Surface Mass Balance of the Greenland Ice Sheet through Assimilation of Multi-Sensor Satellite Products	Tedesco	Marco
Enhanced spatial resolution Melting over Antarctica and linkages to Climate Drivers	Tedesco	Marco
Net total land ice Loss from space-based and in situ global Observations over the recent Years	Cazenave	Anny
An Exponential Model of Altimeter Waveform	Yurchak	Boris
ICESat-2: The next-generation spaceborne laser altimetry mission to measure ice sheet elevation and sea ice thickness	Markus	Thorsten
First Assessments of Predicted ICESat-2 Performance Using Aircraft Data	Neumann	Thomas
Melt Increase and the Impact on mass Balance of Glaciers in the Nuuk Fjord Region, Southwest Greenland	Van As	Dirk
IceBridge Airborne Mission Data and Services at the National Snow and Ice Data Center	Brodzik	Mary Jo
Ice Sheet Dynamics		
Analysis of the Spatial and Temporal Features of the East Antarctic Plateau by Means of Microwave Emission Data	Brogioni	Marco

Snow grain and atmospheric circulation effects on 89 GHz passive microwave brightness temperatures over East Antarctica	Brown	Ian
Adaptive mesh modelling of the Amundsen sea sector glaciers	Cornford	Stephen
Grounding Lines and ice Plains in Antarctica using driving Stress	Depoorter	Mathieu
Geophysical Parameters of outlet Glaciers in the Transantarctic Mountains from TerraSAR-X	Floricioiu	Dana
Aerial Photographs Reveal Late 20th Century Dynamic Ice Loss in Northwestern Greenland	Kjær	Kurt
Comparison between Velocities of the Drygalski ice Tongue (Antarctica) obtained with COSMO-SkyMED and ERS Tandem Pairs	Lugli	Andrea
Ice Velocity in Antarctica over the last 16 Years	Mouginot	Jeremie
Ice Sheet Velocity Mapped from Space: <input type="checkbox"/> An IPY Success Story and the Way Forward <input type="checkbox"/>	Mouginot	Jeremie
Temporal Variations of surface Velocity and Topography of outlet Glaciers in South-West Greenland from X-Band SAR Data	Scharrer	Kilian
Models of Iceberg Calving in Greenland	Taylor	Andrew
Dynamic Variability of four major outlet Glaciers in Greenland	Faezeh	Nick
Ice - Ocean Interactions		
Linkages between thermodynamic Processes operating within melting first-Year Arctic Sea Ice and Satellite SAR Signatures	Landy	Jack
The Impact of winds and sea Surface Temperatures on sea-ice Extent in the Area north of Svalbard	Pavlova	Olga
Spring-Summer first-year Sea Ice geophysical and biophysical Information from polarimetric C band Radar: early Results	Scharien	Randall
Initialisation and Assimilation of sea ice Data in a coupled global ocean-ice Model	Tang	Yongming
A new SMB-elevation feedback Parameterisation for Greenland	Edwards	Tamsin
Impact of Northern hemisphere Snow on the Arctic Ocean in a climate Model	Clifford	Debbie
Arctic Tides from GPS on sea ice	Rose	Stine Kildegard
Drift, thickness, and area of icebergs in the Southern Ocean	Young	Neal
OCOC: from Ocean Colour to Organic Carbon	Heim	Birgit
Calving at Pine Island Glacier	Humbert	Angelika
Glaciers and Ice Caps		
MOUNTAIN GLACIERS OF THE NORTHEASTERN ASIA: NEW ASSESSMENTS	Ananicheva	Maria
Ice surface velocities in West Greenland derived from SAR and GPS	Andersen	Signe Bech
The Karakoram anomaly: ice dynamics, advances and glacier surges derived from multi-mission satellite data	Braun	Matthias
Mapping glaciological parameters from high-resolution SAR data on the Antarctic Peninsula	Braun	Matthias
Evaluation of glacier Changes in the Central Karakoram National Park (CKNP, Pakistan) from Landsat data Analysis	Diolaiuti	Guglielmina
Evaluation of volume and thickness Changes occurred in the Time Frame 2000-2011 at some selected Chilean Glaciers	Diolaiuti	Guglielmina
Advancing in monitoring temperate Glaciers using Ultra-Fine-Beam <input type="checkbox"/> Mode InSAR Offset-Tracking	Ford	Andrew

Glacier-surface Velocities in alpine Area from Terra-SAR-X satellite Imagery-Comparison with GPS Measurements.	Gay	Michel
Evaluation of CryoSAT-2 for height retrieval over the Himalayan range	Gourmelen	Noel
Dynamics and Regionalization of Central Asian Glaciers □ by remote sensing Data □	Konovalov	Vladimir
An Evaluation of the interferometric Mode on Cryosat 2 to generate Elevations over Devon Ice Cap, Canada.	Laurence	Gray
Analysis of surface energy Balance in Glaciers using radar imagery Data (Case Study: ALBORZ Mountains)	Najibi	Nasser
Surface Velocity and ice Discharge of Glaciers on Livingston Island, Antarctica	Navarro	Francisco
Analyses of dynamics of Purogangri ice cap (central Tibetan Plateau) by means of SAR interferometry	Neckel	Niklas
Identification of ablation Rate and ELA using Transient Snowline Variation on two Circumpolar Arctic Glaciers	Pelto	Mauri
Detecting Changes in melt regime Patterns and melt Dynamics of Icefields using passive microwave brightness Temperatures	Semmens	Kathryn
Satellite map Series of long-term Elevation Changes on Eurasia's northernmost Ice Caps	Sharov	Aleksey
Assessing glacier area change in Norway using topographical maps and optical satellite images	Winsvold	Solveig Havstad
Sea Ice		
The Observation of the thin-ice thickness Distribution within the Laptev Sea Polynya using MODIS Data	Adams	Susanne
Seasonal Changes of Thickness, freeboard and snow Depth for multiyear and first-year Ice in the Arctic	Alexandrov	Vitaly
Demonstration of X-band SAR Interferometry over Baltic fast Ice	Berg	Anders
Antarctic sea ice Thickness Retrieval, possible Limitations, Uncertainties and Recommendations	Djepa	Vera
Documenting local ice Dynamics around Nunavik's marine Infrastructures through Remote Sensing and local K	Gauthier	Yves
Sea ice satellite Products available at Ifremer/CERSAT	Girard-Ardhuin	Fanny
Continuous in-situ, airborne and ship-borne Observations for Validation of sea ice remote sensing Data	Hendricks	Stefan
Near Real Time data Products on Thickness of thin Sea Ice and sea ice Albedo	Heygster	Georg
Comparison of local sea ice Motion at a Polynya from SAR Observations and model Simulations	Hollands	Thomas
Sensitivity of Airborne 1.4 GHz Measurements to variable sea Ice Thickness in the Canadian Arctic	Howell	Stephen
Sensitivity of airborne 1.4 GHz Measurements to variable sea ice Thickness in the Canadian Arctic	Howell	Stephen
Dual-Polarisation SAR Sea Ice Type Classification and Iceberg Detection in the western Fram Strait	Hughes	Nick
Classification of Arctic sea ice with combined C- and L-band Synthetic Aperture Radar	Hughes	Nick
BRDF of bare Sea Ice: the Comparisons of the Observations and Measurements	Kokhanovsky	Alexander
Sea Ice Motion Estimation in the Marginal Ice Zone Using Polarimetric SAR	Kræmer	Thomas
Variability and trends in Laptev Sea ice outflow between 1992 - 2011	Kruppen	Thomas

TanDEM-X interferometric and polarimetric Data for Analysis of ice Topography and Conditions around fixed Structures in the Casp	Lang	Oliver
The Impact of Snow and the ice Properties on the Retrieval of thin sea ice Thickness with SMOS	Maaß	Nina
Development fast ice Detection and thin ice thickness estimation Algorithms for AMSR-E in the Antarctic Ocean.	Nihashi	Sohey
Comparison of Terra Nova Bay Polynya Extent as measured by Envisat/ASAR and Cosmo-Skymed Images □	Parmiggiani	Flavio
Increase of sea ice drift Velocities in the Arctic Ocean	Pavlov	Vladimir
Calipso Surface return for Ice and Water Detection	Rodier	Sharon
Sea Ice Downstream Services for Arctic and Antarctic	Sandven	Stein
Automatic landfast sea ice mapping using AMSR-E passive microwave imagery	Selyuzhenok	Valeria
A multisensor and modeling Approach for the spatial Distribution of sea ice Thickness in the seasonal Sea Ice Region	Similä	Markku
Sea ice thickness estimation with SMOS and its validation in Arctic	Tian-Kunze	Xiangshan
Sea Ice Thickness Estimation and Inter-comparisons from Different Satellite Data	Wang	Xuanji
Structure and Dynamics of Arctic Sea-Ice leads from MODIS Data	Willmes	Sascha
Use of CryoSats radar Altimeter System for sea ice Classification	Zygmuntowska	Marta
Sea ice and primary productivity Variations in the Arctic on the Base of remote sensed Data	Sychev	Vitaly
20-years of the ocean Wind Record in the marginal Arctic Seas: Analysis and Data Comparison	Maksimovich	Elena
Preparations by the Canadian Ice Service for Future EO Missions	Arkett	Matt
